THREE REASONS TO UPGRADE TO TRIO C60

POLY TRIO C60 FOR MICROSOFT TEAMS

Poly + Microsoft is not a nice to have, it's a need to have for any organization that is committed to delivering the richest and most complete Teams experience.

HERE ARE THREE REASONS TO UPGRADE TO THE TRIO C60

1. Customers are quickly moving from Skype for Business to Teams and the new Trio C60 has been designed to deliver a rich Teams audio experience in the conference room. Trio 8800 and 8500 will no longer receive Teams feature enhancements.

2. Trio C60 performs up to 4x faster than its predecessors in Teams environments for quicker call connection times, directory searches and menu navigation.

3. Poly's signature audio performance including the innovative NoiseBlockAI for removing background noise while continuing to allow your voice to be heard.
